PROJECTS

Living With Tech Website (livingwithtech.net) 2025

- Developed a full-fledged **blog platform** using **Laravel 8**, **PHP** and **MySQL**.
- Integrated **Google OAuth 2.0** authentication (Sign In With Google)
- Implemented a secure admin panel with custom 2FA system
- Deployed on **Hostinger**

Expense Dashboard - (my-expenses-dash.web.app) 2026

- Built a single-page application (SPA) in **Angular** for analytics and visualization
- Developed **Node.js/Express APIs** connected to **MongoDB** for data retrieval
- Created interactive pie and bar chart visualizations using **Chart.js**
- Implemented **JWT authentication** with route **guards** and **HTTP interceptors**
- Deployed frontend on **Firebase Hosting** & APIs on **Hostinger**

Stutter - Local AI Chatbot (github.com/SiddhantOnGit/stutter) 2025

- Built with HTML, CSS, and **Vanilla JavaScript**
- Uses **LM Studio API** for local LLM inference
- **Fully offline** & privacy-first (no cloud dependencies)
- **Context-aware** conversations with fast, ChatGPT-like responses

Portfolio Website (<https://siddhantongit.github.io/portfolio>) 2025

- Built my personal portfolio website with **Firebase Studio**.
- Leveraged **Gemini AI** to prototype and streamline the design process
- Deployed on **Github Pages**

Weather App (helloweather-app.web.app) 2024

- Made a Dynamic Weather App in **Angular 17**
- Used **WeatherAPI** to fetch weather data
- Deployed on **Firebase Hosting**

PHP Admin Panel Demo 2023

- Created an admin panel for managing student records (CRUD operations).
- Built using **Vanilla PHP**, **HTML**, **CSS**, **Bootstrap**, **Javascript**
